chasing rgb whip light x2
STEP#1

Mounting the led whip lights

a: Mount the base in desired location, the base requires a 0.5'' (13mm) mounting hole.
b: Put the flag into the LED whip's Hook

STEP#2

.Plug-and-play the quick disconnect connectors on the whip light and PRO RGB controller. Please note that arrow must be inline to connect and then screw together.

STEP#3

If you purchased single pc, please refer to the Wire Diagram #A
If you purchased combo set, please refer to the Wire Diagram #B

Wiring diagram #A

Diagram1: Wiring direct to Automotive fuse box and using APP or RF remote control to turn on/off. Need to add 10AMP fuse on red 12V+ wires.

10AMP FUSE HOLDER

**PRO RGB CONTROLLER**

Automotive fuse box

Diagram2: Wiring with a switch. You can add a new dedicated switch or use an existing light switch that outputs 12V+ when ON. You will need to add a 10AMP fuse on the RED 12V+ wire and also requires a 12V relay.
